Have questions? Are you ready to register? Call Lauren M. at (508) 373-7607 today!!!

What is Apprenticeship and Pre-Apprenticeship?

Apprenticeship is a model of workforce training that allows employees to earn while they learn. These programs generally last from one to six years and include a combination of on-the-job training and formal classroom instruction. Registered apprentices earn progressively increasing wages and an industry-recognized credential. Apprenticeships can be overseen either by the U.S. Department of Labor's Office of Apprenticeship or by a State Apprenticeship Agency, while employers and other sponsors administer individual apprenticeship programs.

Pre-apprenticeship programs are designed to prepare individuals to enter and succeed in apprenticeships. While pre-apprenticeship programs are not federally vetted, quality programs have a strong relationship with at least one apprenticeship program, provide training and curriculum that align with that program, and include a wide range of support services designed specifically to ensure students' success.
